

Teaching Evaluations: Summary

Robin Yifan Luo

University of Washington Executive MBA Program, 2022–2025

Students evaluate instructors on a scale from 0 (very poor) to 5 (excellent). Across seven sections, the median overall summative rating is **4.7**, with section ratings from **4.5 to 4.9**. The reports contain 87 responses from 184 enrolled students. The packet following this summary reproduces every original report in full.

Term	Course	Responses	Overall	Review sessions	Teaching effectiveness	Inclusive environment
Autumn 2025	EMBA 520 A	13/25	4.9	4.9	4.9	4.9
Autumn 2025	EMBA 520 B	16/18	4.8	4.8	4.8	4.9
Autumn 2024	EMBA 520 A	15/25	4.6	4.7	4.6	4.8
Autumn 2023	EMBA 520 A	15/26	4.7	4.6	4.8	4.7
Spring 2023	EMBA 540 A	11/46	4.5	4.7	4.9	4.7
Spring 2023	EMBA 540 B	8/23	4.8	4.8	4.9	4.9
Autumn 2022	EMBA 520 B	9/21	4.6	4.7	4.6	4.6
Median			4.7	4.7	4.8	4.8

Notes: EMBA 520 is Financial Management; EMBA 540 is International Finance. Reported values are section medians. The bottom row is the median of the seven section-level medians. “Review sessions” is the item “Usefulness of review sessions.” “Inclusive environment” is the item asking whether the TA facilitated an environment where students from all backgrounds and life experiences felt they belonged and were encouraged to engage.

Selected student comments

- “They complemented very well the class, making the learning more down to earth and applicable. Also they were very structured which made it easier to follow.”
- “During each review session, Robin meticulously guides us through each question. He always take the time to explain the underlying theory behind each one which has been very helpful.”
- “Some students have more quantitative experience in their educational and professional life. Robin kept the right balance of explanation for areas that were more challenging, but not so simplistic that the review session got bogged down.”
- “Robin was extremely well prepared for each review session. He came to each session with multiple relevant examples [to] build our understanding of the topics we were covering.”

The full reports include numeric distributions, formative ratings, response rates, student comments, and the University of Washington’s explanation of its evaluation methodology.

STANDARD OPEN-ENDED QUESTIONS**What aspects of review sessions were most helpful to your learning?**

1. The ability to review at leisure with panopto and the ability to download and review the excel templates.
2. The set up of the presentation notes, ie excel documents were well organized and helpful after the review session.
3. So helpful! These where a cornerstone of the course.
4. Robin's review sessions have been amazing! Super helpful and his spreadsheets made learning and completing the assignments so much easier.
5. The instructor's willingness to answer questions. Providing summaries and sample work,
6. Robin was amazing in explaining incredibly difficult topics in a way that was accessible. The spreadsheets and examples contributed amazingly.
7. Detailed walkthrough of the class concepts
8. Engaging review session.
9. Robin was the most helpful aspect to my learning. He came prepared, had wonderful excel tools that outlined the learning, and was approachable for any questions that popped up. He kept things practical and was a value add to my learning experience.

What aspects of review sessions could be improved?

1. I have no suggestions
2. Ideal state might be to send a few questions etc ahead of time to give extra practice or review. This extra exercise is helpful.
4. Nothing. He's great!
6. None.
9. Canvas is hit or miss. The review sessions were all in the announcements, and was a bother to navigate at times.

How well did the TA utilize teaching strategies that encourage the learning and growth of students from all backgrounds and life experiences? Please provide specific examples or feedback.

1. Very inclusive and patient with students and questions
2. Excellent. Notes were taken, sessions were recorded, funny, and highly knowledgeable.
3. Robin is a magician at excel and finance.
4. All the time.
6. He paused for questions, encouraged participation, made us laugh as we worked through stuff.
8. Good balance of addressing past case work and looking forward.
9. Robin knocked this out of the park. He brought his practical perspective on topics, which made approaching those topics easier when learning them. His excel tools should be studied. It is very easy to follow and understand.

IASystem Course Summary Reports summarize student ratings of a particular course or combination of courses. They provide a rich perspective on student views by reporting responses in three ways: as frequency distributions, average ratings, and either comparative or adjusted ratings. Remember in interpreting results that it is important to keep in mind the number of students who evaluated the course relative to the total course enrollment as shown on the upper right-hand corner of the report.

Frequency distributions. The percentage of students who selected each response choice is displayed for each item. Percentages are based on the number of students who answered the respective item rather than the number of students who evaluated the course because individual item response is optional.

Median ratings. IASystem reports average ratings in the form of item medians. Although means are a more familiar type of average than medians, they are less accurate in summarizing student ratings. This is because ratings distributions tend to be strongly skewed. That is, most of the ratings are at the high end of the scale and trail off to the low end.

The median indicates the point on the rating scale at which half of the students selected higher ratings, and half selected lower. Medians are computed to one decimal place by interpolation.¹ In general, higher medians reflect more favorable ratings. To interpret median ratings, compare the value of each median to the respective response scale: *Very Poor, Poor, Fair, Good, Very Good, Excellent (0-5); Never/None/Much Lower, About Half/Average, Always/Great/Much Higher (1-7); Slight, Moderate, Considerable, Extensive (1-4)*.

Comparative ratings. IASystem provides a normative comparison for each item by reporting the decile rank of the item median. Decile ranks compare the median rating of a particular item to ratings of the same item over the previous two academic years in all classes at the institution and within the college, school, or division. Decile ranks are shown only for items with sufficient normative data.

Decile ranks range from 0 (lowest) to 9 (highest). For all items, higher medians yield higher decile ranks. The 0 decile rank indicates an item median in the lowest 10% of all scores. A decile rank of 1 indicates a median above the bottom 10% and below the top 80%. A decile rank of 9 indicates a median in the top 10% of all scores. Because average ratings tend to be high, a rating of "good" or "average" may have a low decile rank.

Adjusted ratings. Research has shown that student ratings may be somewhat influenced by factors such as class size, expected grade, and reason for enrollment. To correct for this, IASystem reports **adjusted medians** for summative items (items #1-4 and their combined global rating) based on regression analyses of ratings over the previous two academic years in all classes at the respective institution. If large classes at the institution tend to be rated lower than small classes, for example, the adjusted medians for large classes will be slightly higher than their unadjusted medians.

When adjusted ratings are displayed for summative items, **relative rank** is displayed for the more specific (formative) items. Rankings serve as a guide in directing instructional improvement efforts. The top ranked items (1, 2, 3, etc.) represent areas that are going well from a student perspective; whereas the bottom ranked items (18, 17, 16, etc.) represent areas in which the instructor may want to make changes. Relative ranks are computed by first standardizing each item (subtracting the overall institutional average from the item rating for the particular course, then dividing by the standard deviation of the ratings across all courses) and then ranking those standardized scores.

Challenge and Engagement Index (CEI). Several IASystem items ask students how academically challenging they found the course to be. IASystem calculates the average of these items and reports them as a single index. *The Challenge and Engagement Index (CEI)* correlates only modestly with the global rating (median of items 1-4).

Optional Items. Student responses to instructor-supplied items are summarized at the end of the evaluation report. Median responses should be interpreted in light of the specific item text and response scale used (response values 1-6 on paper evaluation forms).

¹ For the specific method, see, for example, Guilford, J.P. (1965). *Fundamental statistics in psychology and education*. New York: McGraw-Hill Book Company, pp. 49-53.

STANDARD OPEN-ENDED QUESTIONS**What aspects of review sessions were most helpful to your learning?**

1. Review sessions were helpful and addressed key topics to focus on.
2. step by step walkthroughs, excel workbooks, clear formulas applied
3. The reviews are very well structured and have great examples with all the formulas.
4. case problems
5. Super effective at distilling concepts to common sense language.
6. Very much appreciated Robin's thoughtful, relevant examples and his patience in answering student questions
7. The example problems and spreadsheets. I loved it. You did such a good job.
8. Organized, broke down and explained complex concepts in understandable way. Provided excellent complement to the lectures in helping us visualize and apply the concepts.
9. Great TA
10. All very good.
11. Robin was in my opinion, the best TA we've had so far in this EMBA program. His review sessions were AMAZING and the templates he provided were SUPER helpful in answering case questions and quizzes. I think I would have struggled in this class had it not been for Robin's ability to simplify things for me. Finance isn't my strong suit and Robin made it easy for me. I really appreciate him!!!
12. The breakdown of the problems in layman's terms, Robin's ability to simplify how to work through the problem greatly contributed to my learning and understanding of course concepts.
13. Clear and articulate instruction.

What aspects of review sessions could be improved?

1. I struggled with timing of the session but that is a personal issue :)
2. all good and clearly defined!
3. N/A
4. case problems during review sessions are often simpler than assignments, so finding ways to enhance the learning could be helpful but overall the repetition is useful
5. Don't change a thing.
6. Not Robin's fault at all but the same review session being held for both monthly and weekly was suboptimal because it prevented Robin from reviewing the questions as the classes were ready. The monthly was usually behind and the weekly felt watered down to not give answers away to monthly.
7. These were some of the best review sessions yet.
8. Having joint sessions between the cohorts was difficult as each cohort was at different place in the curriculum. Instructor was limited in what could be covered due to one of the classes (or the other) not having covered that content yet. This detracted from both cohorts' learning experience.
9. Great TA
11. Nothing. Robin was perfect.
12. N/A
13. No complaints.

How well did the TA utilize teaching strategies that encourage the learning and growth of students from all backgrounds and life experiences? Please provide specific examples or feedback.

1. Very collaborative, focused on student needs.
3. All the detailed step by step instructions of each concepts with examples are very helpful.
4. very responsive to specific questions
5. Robin was incredible.
6. Extremely effective

8. Robin was resourceful, responsive, and helpful throughout. He was able to break down and explain confusing concepts in ways that made it easy to understand - even for students with no prior financial experience or knowledge prior to the program. He was also very helpful answering questions in between help sessions. Thank you, Robin!

9. Great TA

10. It was excellent. Openness and encourage.

11. Robin gave everyone an opportunity to ask questions, and he made sure everyone was clear on the concepts. He was patient, and clear. Excellent communicator!!!

12. Robin was the best TA I have experienced during this program. His help sessions and delivery greatly affected my understanding of course concepts.

13. Very well. The strategies involve clear articulation and provide resources available to students.

IASystem Course Summary Reports summarize student ratings of a particular course or combination of courses. They provide a rich perspective on student views by reporting responses in three ways: as frequency distributions, average ratings, and either comparative or adjusted ratings. Remember in interpreting results that it is important to keep in mind the number of students who evaluated the course relative to the total course enrollment as shown on the upper right-hand corner of the report.

Frequency distributions. The percentage of students who selected each response choice is displayed for each item. Percentages are based on the number of students who answered the respective item rather than the number of students who evaluated the course because individual item response is optional.

Median ratings. IASystem reports average ratings in the form of item medians. Although means are a more familiar type of average than medians, they are less accurate in summarizing student ratings. This is because ratings distributions tend to be strongly skewed. That is, most of the ratings are at the high end of the scale and trail off to the low end.

The median indicates the point on the rating scale at which half of the students selected higher ratings, and half selected lower. Medians are computed to one decimal place by interpolation.¹ In general, higher medians reflect more favorable ratings. To interpret median ratings, compare the value of each median to the respective response scale: *Very Poor, Poor, Fair, Good, Very Good, Excellent (0-5); Never/None/Much Lower, About Half/Average, Always/Great/Much Higher (1-7); Slight, Moderate, Considerable, Extensive (1-4)*.

Comparative ratings. IASystem provides a normative comparison for each item by reporting the decile rank of the item median. Decile ranks compare the median rating of a particular item to ratings of the same item over the previous two academic years in all classes at the institution and within the college, school, or division. Decile ranks are shown only for items with sufficient normative data.

Decile ranks range from 0 (lowest) to 9 (highest). For all items, higher medians yield higher decile ranks. The 0 decile rank indicates an item median in the lowest 10% of all scores. A decile rank of 1 indicates a median above the bottom 10% and below the top 80%. A decile rank of 9 indicates a median in the top 10% of all scores. Because average ratings tend to be high, a rating of "good" or "average" may have a low decile rank.

Adjusted ratings. Research has shown that student ratings may be somewhat influenced by factors such as class size, expected grade, and reason for enrollment. To correct for this, IASystem reports **adjusted medians** for summative items (items #1-4 and their combined global rating) based on regression analyses of ratings over the previous two academic years in all classes at the respective institution. If large classes at the institution tend to be rated lower than small classes, for example, the adjusted medians for large classes will be slightly higher than their unadjusted medians.

When adjusted ratings are displayed for summative items, **relative rank** is displayed for the more specific (formative) items. Rankings serve as a guide in directing instructional improvement efforts. The top ranked items (1, 2, 3, etc.) represent areas that are going well from a student perspective; whereas the bottom ranked items (18, 17, 16, etc.) represent areas in which the instructor may want to make changes. Relative ranks are computed by first standardizing each item (subtracting the overall institutional average from the item rating for the particular course, then dividing by the standard deviation of the ratings across all courses) and then ranking those standardized scores.

Challenge and Engagement Index (CEI). Several IASystem items ask students how academically challenging they found the course to be. IASystem calculates the average of these items and reports them as a single index. *The Challenge and Engagement Index (CEI)* correlates only modestly with the global rating (median of items 1-4).

Optional Items. Student responses to instructor-supplied items are summarized at the end of the evaluation report. Median responses should be interpreted in light of the specific item text and response scale used (response values 1-6 on paper evaluation forms).

¹ For the specific method, see, for example, Guilford, J.P. (1965). *Fundamental statistics in psychology and education*. New York: McGraw-Hill Book Company, pp. 49-53.

STANDARD OPEN-ENDED QUESTIONS**What aspects of review sessions were most helpful to your learning?**

1. they were organized and directly addressed class material and assignments/quizzes in a concise manner.
2. I really liked the use of the spreadsheet for the topics and conversation for the help sessions. The tips and guidance provided to help with the homework and quizzes.
3. I did not attend.
4. Robin included topics covered in class and also future topics, which familiarized us with topics when they were discussed in class. The agenda was well organized with hints for cases, which was highly appreciated.
5. 'class discussions

What aspects of review sessions could be improved?

1. organization. prep for zoom sessions. ta knew the material but stumbled a bit. practice prior to presenting would be recommend.
2. I really would of liked more breakdown on the overall valuation and build up on it on every help sessions.
3. I did not attend.
5. The time for a help session can be too late.

How well did the TA utilize teaching strategies that encourage the learning and growth of students from all backgrounds and life experiences? Please provide specific examples or feedback.

2. Very well, Robin was always available for questions at any hour of the day! Really appreciated his availability.
3. I did not attend sessions.
4. Robin was very open to responding to questions outside of the formal review sessions. I appreciate his help on getting concepts cleared. He made the concepts super relatable and simplified. Thank you, Robin!
5. Excellently.

IASystem Course Summary Reports summarize student ratings of a particular course or combination of courses. They provide a rich perspective on student views by reporting responses in three ways: as frequency distributions, average ratings, and either comparative or adjusted ratings. Remember in interpreting results that it is important to keep in mind the number of students who evaluated the course relative to the total course enrollment as shown on the upper right-hand corner of the report.

Frequency distributions. The percentage of students who selected each response choice is displayed for each item. Percentages are based on the number of students who answered the respective item rather than the number of students who evaluated the course because individual item response is optional.

Median ratings. IASystem reports average ratings in the form of item medians. Although means are a more familiar type of average than medians, they are less accurate in summarizing student ratings. This is because ratings distributions tend to be strongly skewed. That is, most of the ratings are at the high end of the scale and trail off to the low end.

The median indicates the point on the rating scale at which half of the students selected higher ratings, and half selected lower. Medians are computed to one decimal place by interpolation.¹ In general, higher medians reflect more favorable ratings. To interpret median ratings, compare the value of each median to the respective response scale: *Very Poor, Poor, Fair, Good, Very Good, Excellent (0-5); Never/None/Much Lower, About Half/Average, Always/Great/Much Higher (1-7); Slight, Moderate, Considerable, Extensive (1-4)*.

Comparative ratings. IASystem provides a normative comparison for each item by reporting the decile rank of the item median. Decile ranks compare the median rating of a particular item to ratings of the same item over the previous two academic years in all classes at the institution and within the college, school, or division. Decile ranks are shown only for items with sufficient normative data.

Decile ranks range from 0 (lowest) to 9 (highest). For all items, higher medians yield higher decile ranks. The 0 decile rank indicates an item median in the lowest 10% of all scores. A decile rank of 1 indicates a median above the bottom 10% and below the top 80%. A decile rank of 9 indicates a median in the top 10% of all scores. Because average ratings tend to be high, a rating of "good" or "average" may have a low decile rank.

Adjusted ratings. Research has shown that student ratings may be somewhat influenced by factors such as class size, expected grade, and reason for enrollment. To correct for this, IASystem reports **adjusted medians** for summative items (items #1-4 and their combined global rating) based on regression analyses of ratings over the previous two academic years in all classes at the respective institution. If large classes at the institution tend to be rated lower than small classes, for example, the adjusted medians for large classes will be slightly higher than their unadjusted medians.

When adjusted ratings are displayed for summative items, **relative rank** is displayed for the more specific (formative) items. Rankings serve as a guide in directing instructional improvement efforts. The top ranked items (1, 2, 3, etc.) represent areas that are going well from a student perspective; whereas the bottom ranked items (18, 17, 16, etc.) represent areas in which the instructor may want to make changes. Relative ranks are computed by first standardizing each item (subtracting the overall institutional average from the item rating for the particular course, then dividing by the standard deviation of the ratings across all courses) and then ranking those standardized scores.

Challenge and Engagement Index (CEI). Several IASystem items ask students how academically challenging they found the course to be. IASystem calculates the average of these items and reports them as a single index. *The Challenge and Engagement Index (CEI)* correlates only modestly with the global rating (median of items 1-4).

Optional Items. Student responses to instructor-supplied items are summarized at the end of the evaluation report. Median responses should be interpreted in light of the specific item text and response scale used (response values 1-6 on paper evaluation forms).

¹ For the specific method, see, for example, Guilford, J.P. (1965). *Fundamental statistics in psychology and education*. New York: McGraw-Hill Book Company, pp. 49-53.

STANDARD OPEN-ENDED QUESTIONS**What aspects of review sessions were most helpful to your learning?**

1. They complemented very well the class, making the learning more down to earth and applicable. Also they were very structured which made it easier to follow.
2. Wonderful overview and presentation.
3. Robin was fantastic. Great lecturer. Very responsive. Knew the material very well.
4. Heads-up detail on upcoming casework during help sessions was awesome.
5. the organization of the sessions ... superb! walking through cases was very helpful
6. Robin's specific examples and tips were extremely helpful, as was his calm and confident demeanor.
7. Examples that are relevant to cases were very helpful.
8. Robin was consistently available and provided salient advice and feedback for homework assignments.
9. I really enjoyed Robin's help sessions and found them useful.
10. Great cases with calculations and concepts.

What aspects of review sessions could be improved?

1. None
2. Nothing.
3. Nothing.
4. Sample case work with showing how to do the work prior to attempting the real case work at first itself.
5. More examples / cases to walk through
6. The stated grading philosophy of the course by Professor Karpoff was to focus on effort over precision in homework, so it was frustrating to receive points off for small errors, and in some cases to be double-penalized if an assumption in a prior part of a problem was carried forward into other calculations, and points were deducted everywhere that the assumption was used.
7. couple of sessions concepts were not aligned with classes and we made mistakes in the assignments. It would help to align.
9. During the help sessions, Robin scrolled and clicked around in the example spreadsheets a lot while he was discussing the work. It was really difficult to follow when the screen kept moving up and down and various parts of the questions and/or answers were randomly highlighted and then unhighlighted.
10. Nothing, everything is perfect.

How well did the TA utilize teaching strategies that encourage the learning and growth of students from all backgrounds and life experiences? Please provide specific examples or feedback.

1. He was very clear, patient and knowledgeable. I had a pretty good experience.
3. Great. Was very available. Incorporated many classmates' experiences and backgrounds.
4. Robin is awesome and he did well in help sessions.
5. Always adapted to student / participant needs; responsive to questions during the sessions as well as outside sessions
7. Excellent, he allowed us to ask any questions and made himself available.
10. TA was excellent in explaining doubts and clearing the concepts.

IASystem Course Summary Reports summarize student ratings of a particular course or combination of courses. They provide a rich perspective on student views by reporting responses in three ways: as frequency distributions, average ratings, and either comparative or adjusted ratings. Remember in interpreting results that it is important to keep in mind the number of students who evaluated the course relative to the total course enrollment as shown on the upper right-hand corner of the report.

Frequency distributions. The percentage of students who selected each response choice is displayed for each item. Percentages are based on the number of students who answered the respective item rather than the number of students who evaluated the course because individual item response is optional.

Median ratings. IASystem reports average ratings in the form of item medians. Although means are a more familiar type of average than medians, they are less accurate in summarizing student ratings. This is because ratings distributions tend to be strongly skewed. That is, most of the ratings are at the high end of the scale and trail off to the low end.

The median indicates the point on the rating scale at which half of the students selected higher ratings, and half selected lower. Medians are computed to one decimal place by interpolation.¹ In general, higher medians reflect more favorable ratings. To interpret median ratings, compare the value of each median to the respective response scale: *Very Poor, Poor, Fair, Good, Very Good, Excellent (0-5); Never/None/Much Lower, About Half/Average, Always/Great/Much Higher (1-7); Slight, Moderate, Considerable, Extensive (1-4)*.

Comparative ratings. IASystem provides a normative comparison for each item by reporting the decile rank of the item median. STANDARD OPEN-ENDED QUESTIONS**What aspects of review sessions were most helpful to your learning?**

1. Robin is one of the best TA's I have had. He is the aspect the contributed most to my learning. He was very helpful at answering questions and was excellent at slide deck creation that was helpful information downstream.
2. The basics of finance was hard for me. I liked that the TA run through the basics at the help session.
3. Very solid examples and explanations that helped to reinforce the curriculum.
4. Great job, thank you for your help and patience !!
5. The help sessions were relevant and helped reinforce the learning of the material.

What aspects of review sessions could be improved?

1. I have nothing to add here really. If you sat through as many of these as I have Robin sets the bar high.
3. No notes
5. Additional help sessions would be nice for this course.

How well did the TA utilize teaching strategies that encourage the learning and growth of students from all backgrounds and life experiences? Please provide specific examples or feedback.

1. Robins materials were excellent, and he included everyone including myself which I am not a finance expert. He was inclusive by inviting all folks to participate with any questions.
3. Very approachable and humble about his own skillset, specifically accounting. it was helpful to know he knew some of the concepts were new to us.
5. TA was very organized in his delivery, but allowed the class to ask questions. TA was definitely knowledgeable in the subject matter, and was able to explain things clearly.

IASystem Course Summary Reports summarize student ratings of a particular course or combination of courses. They provide a rich perspective on student views by reporting responses in three ways: as frequency distributions, average ratings, and either comparative or adjusted ratings. Remember in interpreting results that it is important to keep in mind the number of students who evaluated the course relative to the total course enrollment as shown on the upper right-hand corner of the report.

Combined Median	Adjusted Combined Median
4.8	5.0
(0=lowest; 5=highest)	

Challenge and Engagement Index (CEI) combines student responses to several *IASystem* items relating to how academically challenging students found the course to be and how engaged they were:

CEI: 4.5
(1=lowest; 7=highest)

SUMMATIVE ITEMS

	N	Excellent (5)	Very Good (4)	Good (3)	Fair (2)	Poor (1)	Very Poor (0)	Median	Adjusted Median
The quiz section as a whole was:	8	75%	12%	12%				4.8	5.1
The content of the quiz section was:	8	75%	12%	12%				4.8	5.1
The quiz section instructor's (QSI's) contribution to the course was:	8	75%	12%	12%				4.8	5.0
The QSI's effectiveness in teaching the subject matter was:	8	75%	12%	12%				4.8	5.0

STUDENT ENGAGEMENT

	N	Much Higher (7)	(6)	(5)	Average (4)	(3)	(2)	Much Lower (1)	Median
Relative to other college courses you have taken:									
Do you expect your grade in this course to be:	8		38%	12%	50%				4.5
The intellectual challenge presented was:	8	12%	50%		38%				5.8
The amount of effort you put into this course was:	8		50%	12%	38%				5.5
The amount of effort to succeed in this course was:	8		62%		38%				5.7
Your involvement in course (doing assignments, attending classes, etc.) was:	8		50%	12%	38%				5.5

On average, how many hours per week have you spent on this course, including attending classes, doing readings, reviewing notes, writing papers and any other course related work?

Class median: 2.8 Hours per credit: 1.4 (N=6)

Under 2	2-3	4-5	6-7	8-9	10-11	12-13	14-15	16-17	18-19	20-21	22 or more
17%	50%	33%									

From the total average hours above, how many do you consider were valuable in advancing your education?

Class median: 2.8 Hours per credit: 1.4 (N=6)

Under 2	2-3	4-5	6-7	8-9	10-11	12-13	14-15	16-17	18-19	20-21	22 or more
17%	50%	33%									

What grade do you expect in this course?

Class median: 3.5 (N=6)

A (3.9-4.0)	A- (3.5-3.8)	B+ (3.2-3.4)	B (2.9-3.1)	B- (2.5-2.8)	C+ (2.2-2.4)	C (1.9-2.1)	C- (1.5-1.8)	D+ (1.2-1.4)	D (0.9-1.1)	D- (0.7-0.8)	F (0.0)	Pass	Credit	No Credit
17%	33%	33%	17%											

In regard to your academic program, is this course best described as:

(N=6)

In your major	A core/distribution requirement	An elective	In your minor	A program requirement	Other
17%	17%			50%	17%

STANDARD FORMATIVE ITEMS

	N	Excellent (5)	Very Good (4)	Good (3)	Fair (2)	Poor (1)	Very Poor (0)	Median	Relative Rank
Usefulness of review sessions was:	8	75%	12%	12%				4.8	
TA's use of examples and illustrations was:	8	88%		12%				4.9	
Student confidence in TA's knowledge was:	8	88%		12%				4.9	
Answers to student questions were:	8	88%		12%				4.9	1
Availability of extra help when needed was:	8	88%		12%				4.9	2
TA's effectiveness in teaching the subject matter was:	8	88%		12%				4.9	
Quality/helpfulness of TA feedback was:	8	88%		12%				4.9	
The TA's facilitation of an inclusive teaching environment where all types of students (e.g., gender, race/ethnicity, sexuality, nationality, socio-economic status, belief systems, age, etc.) felt they belonged and were encouraged to engage was:	8	88%		12%				4.9	

EMBA 540 B
International Finance
Course type: Face-to-Face
Taught by: Robin Luo, Stephan Siegel
Instructor Evaluated: Robin Luo-Predoc Inst

Evaluation Delivery: Online
Evaluation Form: F33
Responses: 8/23 (35% moderate)

STANDARD OPEN-ENDED QUESTIONS**What aspects of review sessions were most helpful to your learning?**

1. All of them were extremely useful and relevant.
3. Robin was very helpful in everything.
4. Pre-session publishing of deck, recording of sessions, review of assignments

What aspects of review sessions could be improved?

1. Nothing
3. Robin could tell more jokes, he has good ones.

How well did the TA utilize teaching strategies that encourage the learning and growth of students from all backgrounds and life experiences? Please provide specific examples or feedback.

1. Utilized all of the strategies to great effect.
2. During each review session, Robin meticulously guides us through each question. He always take the time to explain the underlying theory behind each one which has been very helpful.
4. Robin always provided detailed explanations of problems, answered any and all questions, and was always willing to schedule extra time if needed.

IASystem Course Summary Reports summarize student ratings of a particular course or combination of courses. They provide a rich perspective on student views by reporting responses in three ways: as frequency distributions, average ratings, and either comparative or adjusted ratings. Remember in interpreting results that it is important to keep in mind the number of students who evaluated the course relative to the total course enrollment as shown on the upper right-hand corner of the report.

Frequency distributions. The percentage of students who selected each response choice is displayed for each item. Percentages are based on the number of students who answered the respective item rather than the number of students who evaluated the course because individual item response is optional.

Median ratings. IASystem reports average ratings in the form of item medians. Although means are a more familiar type of average than medians, they are less accurate in summarizing student ratings. This is because ratings distributions tend to be strongly skewed. That is, most of the ratings are at the high end of the scale and trail off to the low end.

The median indicates the point on the rating scale at which half of the students selected higher ratings, and half selected lower. Medians are computed to one decimal place by interpolation.¹ In general, higher medians reflect more favorable ratings. To interpret median ratings, compare the value of each median to the respective response scale: *Very Poor, Poor, Fair, Good, Very Good, Excellent (0-5); Never/None/Much Lower, About Half/Average, Always/Great/Much Higher (1-7); Slight, Moderate, Considerable, Extensive (1-4)*.

Comparative ratings. IASystem provides a normative comparison for each item by reporting the decile rank of the item median. Decile ranks compare the median rating of a particular item to ratings of the same item over the previous two academic years in all classes at the institution and within the college, school, or division. Decile ranks are shown only for items with sufficient normative data.

Decile ranks range from 0 (lowest) to 9 (highest). For all items, higher medians yield higher decile ranks. The 0 decile rank indicates an item median in the lowest 10% of all scores. A decile rank of 1 indicates a median above the bottom 10% and below the top 80%. A decile rank of 9 indicates a median in the top 10% of all scores. Because average ratings tend to be high, a rating of "good" or "average" may have a low decile rank.

Adjusted ratings. Research has shown that student ratings may be somewhat influenced by factors such as class size, expected grade, and reason for enrollment. To correct for this, IASystem reports **adjusted medians** for summative items (items #1-4 and their combined global rating) based on regression analyses of ratings over the previous two academic years in all classes at the respective institution. If large classes at the institution tend to be rated lower than small classes, for example, the adjusted medians for large classes will be slightly higher than their unadjusted medians.

When adjusted ratings are displayed for summative items, **relative rank** is displayed for the more specific (formative) items. Rankings serve as a guide in directing instructional improvement efforts. The top ranked items (1, 2, 3, etc.) represent areas that are going well from a student perspective; whereas the bottom ranked items (18, 17, 16, etc.) represent areas in which the instructor may want to make changes. Relative ranks are computed by first standardizing each item (subtracting the overall institutional average from the item rating for the particular course, then dividing by the standard deviation of the ratings across all courses) and then ranking those standardized scores.

Challenge and Engagement Index (CEI). Several IASystem items ask students how academically challenging they found the course to be. IASystem calculates the average of these items and reports them as a single index. *The Challenge and Engagement Index (CEI)* correlates only modestly with the global rating (median of items 1-4).

Optional Items. Student responses to instructor-supplied items are summarized at the end of the evaluation report. Median responses should be interpreted in light of the specific item text and response scale used (response values 1-6 on paper evaluation forms).

Responses: 9/21 (43% moderate)

STANDARD OPEN-ENDED QUESTIONS**What aspects of review sessions were most helpful to your learning?**

1. Robin was very efficient in running the help sessions, the help sessions are a great supplement to the lecture materials and was very helpful for the quiz, thanks Robin!
2. Robin was very helpful during the sessions in helping to provide useful examples. Practice is the best way to get better and this was the very helpful part of the session
3. Robins did a great job providing the tools and explanations required to understand the work.
5. Robin was extremely well prepared for each review session. He came to each session with multiple relevant examples build our understanding of the topics we were covering. It was clear that Robin put thought into how he would explain the material (especially the more challenging concepts) and planned his review sessions accordingly.

What aspects of review sessions could be improved?

2. I think the way he executes them today are very effective considering normal participation of the class
3. Nothing, Robin did great.
4. having 5 classes / half the course front loaded in the first class period detracted from my ability to fully absorb course content. I feel like I was playing catch-up right up through the final. please spread them out more evenly
5. I do not have any suggestions of how Robin's review sessions could be improved. I thought they were very well organized and run.

How well did the TA utilize teaching strategies that encourage the learning and growth of students from all backgrounds and life experiences? Please provide specific examples or feedback.

2. I think he effectively review topics and then takes time to answer questions and try to explain in multiple ways to reach multiple students.
3. Robin could not have done any better.
5. Some students have more quantitative experience in their educational and professional life. Robin kept the right balance of explanation for areas that were more challenging, but not so simplistic that the review session got bogged down. He was able to handle all questions in a way that added to the learning environment ensuring everyone had the opportunity to ask what they needed to. Robin did an outstanding job of making tough subject matter accessible and inclusive for all students.

IASystem Course Summary Reports summarize student ratings of a particular course or combination of courses. They provide a rich perspective on student views by reporting responses in three ways: as frequency distributions, average ratings, and either comparative or adjusted ratings. Remember in interpreting results that it is important to keep in mind the number of students who evaluated the course relative to the total course enrollment as shown on the upper right-hand corner of the report.

Frequency distributions. The percentage of students who selected each response choice is displayed for each item. Percentages are based on the number of students who answered the respective item rather than the number of students who evaluated the course because individual item response is optional.
